# Între Ape Waters of in-betweenness

*Water of in-betweenness* brings together four interdisciplinary initiatives exploring the social ecology of water. Over 30 artists, architects, curators and cultural managers engaged in researching bodies of water, hydrological and wetland ecosystems in rural Romania in 2024. The exhibition presents fragments from the projects *Smart River Cluster*, *Flowing Streams*, *On rains, rivers, streams...* and *AfterLand*. The program of connecting events is dedicated to cultural practitioners and the eco-conscious public, to foster a trans-local conversation at the intersection between people and waters.
